SUMMARY

Customer-focused MCA student with strong technical troubleshooting skills and hands-on experience in cloud platforms, Linux systems, and web technologies. Proven ability to diagnose and resolve technical issues, provide excellent customer support, and communicate complex technical concepts clearly. Experienced with AWS, Azure, Docker, and various development tools. Seeking a Technical Support Engineer role to leverage technical expertise and problem-solving skills in delivering exceptional customer experiences.

TECHNICAL SKILLS

- **Operating Systems:** Linux (Ubuntu, Kali), Windows, troubleshooting.
- **Cloud Platforms:** AWS (EC2, S3, and IAM), Microsoft Azure (VMs and Storage), and Firebase.
- **Development Tools:** Git, GitHub, Docker, VS Code.
- **Programming:** Python, Bash scripting, SQL.
- **Networking:** TCP/IP, DNS, DHCP, SSH, VPN, and network troubleshooting.

EDUCATION

Master of Computer Applications (MCA) – AI & Machine Learning *July 2025 -May 2027*
Sri Balaji University, Pune Pursuing

Bachelor of Computer Applications (BCA) – Cloud Computing *September 2022 -May 2025*
D Y Patil International University, Pune

PROJECTS

Cloud Infrastructure Support & Troubleshooting *2024*

- Deployed and managed Linux servers on AWS EC2 and Azure VMs and resolved configuration issues
- Troubleshoot network connectivity, security group, and IAM permission problems
- Documented setup procedures and created troubleshooting guides for common issues
- Automated routine maintenance tasks using Bash scripts

Technical Documentation & Knowledge Management *2024*

- Created comprehensive documentation for system configurations and deployment procedures
- Developed troubleshooting guides and FAQs for common technical issues
- Maintained knowledge base with solutions to recurring problems
- Practiced explaining technical concepts to non-technical audiences

CERTIFICATIONS & TRAINING

- **Kali Linux Essential Training** – Linux security and system troubleshooting
- **Programming Concepts for Python** – Python programming fundamentals

KEY STRENGTHS

- **Problem-Solving:** Strong analytical skills with a systematic approach to diagnosing complex technical issues
- **Communication:** Excellent written and verbal communication, ability to explain technical concepts clearly
- **Customer Service:** Patient, empathetic, and committed to providing excellent support experiences
- **Team Collaboration:** Experience working remotely with distributed teams using Git and collaboration tools
